## CANDLE CARE

Always trim your wick to 1/4in (6.35mm) before lighting.

Burn for a minimum of 1 hour, and a maximum of 4 hours.

Never light the candle with foreign objects in the wax pool.

Keep your candle away from fans, vents, or other sources of moving air.

If the flame is burning too high, smoking, and flickering, extinguish the candle.

Keep your candle out of reach from children or pets.
